

What is Forensic Accounting?

Forensic accounting is the successful integration of accounting, auditing and investigative skills.

Forensic accounting has existed for years becoming a vital component of the insurance industry. A complex business environment is dependent on the integrated specialties of accounting, auditing and investigative techniques.

Forensic Accounting expertise includes:

- Business interruption
- Expert analysis and testimony
- Claims litigation preparation
- Determination of Commercial losses including equipment and inventory losses
- Loss of self-employment earnings claims
- Fraud, theft or embezzlement
- Residual value policies
- Surety claims

Forensic Accounting

Forensic accounting relating to insurance claims is a wide and diversified field. There are many situations when a Forensic Accountant is needed.

The Forensic Accountant should be retained as early as possible to facilitate loss mitigation and reduce the overall cost. The Forensic Accountant can assist with settlement negotiations, provide a preliminary assessment of the quantum of damages, assist with the examination for discovery and provide expert analysis and testimony.

Brockman & Partners specializes in loss claim accounting and litigation services for Insurance Companies and their Representatives, Insureds, and Independent Loss Adjusters.

Brockman & Partners is committed to providing the highest quality service, in a timely manner, while utilizing over 20 years of experience which encompasses all facets of accounting services both in the public and private sectors.

We believe in a concise, clear explanation of complex accounting issues.

We will work with you in preparation or at trial to achieve outstanding results.

We can provide you with a competitive fee structure.
